## Work Experience

**Automation Software Developer Intern — Humanity Founders (Certificate)** October 2025 – January 2026

- Built and maintained multiple browser automation workflows using Node.js and Playwright for production systems.
- Improved reliability of authentication and session-based workflows by handling dynamic application behavior and secure session storage.
- Deployed automation services to cloud platforms and monitored execution stability across production environments using CI/CD pipelines.

## Projects

**Troop — Real-Time Video Conferencing App** — React, Node.js, Socket.IO, WebRTC – Live Code

- Built a real-time video conferencing system supporting live audio, video, chat, and screen sharing — handling concurrent sessions using WebRTC and Socket.IO.
- Implemented backend logic to manage meeting sessions, user connections, and real-time events using Socket.IO.
- Handled user authentication and session management using JWT and stored meeting and user data in MongoDB.

**CVCraft — Resume Builder with Live Preview** — React, Node.js, Express.js, MongoDB, Gemini API – Live Code

- Developed a full stack resume builder allowing users to create, edit, and manage multiple resumes with live preview and PDF download.
- Built REST APIs for managing users, resumes, and resume sections with JWT-based authentication.
- Integrated Google Gemini API to enhance resume content using prompt engineering, returning structured JSON with improved descriptions and skill suggestions.

**Trade Easy — Stock Trading Simulator** — React, Node.js, Express.js, MongoDB – Live Code

- Built backend services for virtual trading and portfolio management, integrating live stock market APIs for real-time price data and chart updates.
- Implemented backend validations and alert logic to maintain consistency in trades and portfolio updates.

## Technical Skills

**Programming & Core Computer Science:** Java, Python, Object-Oriented Programming (OOPS), Data Structures & Algorithms, Operating Systems, Computer Networks, Problem Solving

**Backend Development:** Node.js, Express.js, REST API Design, Authentication (JWT)

**Databases:** MongoDB, MySQL, PostgreSQL

**Frontend Development:** React.js, JavaScript, HTML, CSS, Next.js, Tailwind CSS, Bootstrap, Material UI (MUI), Responsive Design

**Cloud & DevOps:** Docker, Kubernetes, CI/CD, AWS, Google Cloud Platform, Vercel, Render

**AI & Integrations:** Google Gemini API, LLM Integration, Prompt Engineering

**Tools:** Git, GitHub, Visual Studio Code, Postman, Playwright

## Education

**Bharat Institute of Engineering and Technology**

*Bachelor of Technology in Computer Science and Engineering*

**Excellent Junior College**

*Intermediate in MPC*

**Resonance Info High School**

*Secondary School Certificate (SSC)*

**November 2021 – July 2025**

*Hyderabad, India*

**June 2019 – March 2021**

*Khammam, India*

**June 2018 – March 2019**

*Khammam, India*

## Certifications

- Full Stack Web Development** — Apna College (Certificate)
- Principles of Generative AI** — Infosys Springboard (Certificate)
- AI Premier Certification** — Infosys Springboard (Certificate)
- DSA with Java** — Apna College (Certificate)
